

Harold Singer (R6)

- Quantify NPS Related to TMDLs
- Looking at other items beyond logging and AP and past conference; Heard about Air Deposition and post fire.
- How to monitor Effectiveness and quantify ability of BMPs to get things done.
- Peers working with peers outside regulatory arena; Need to encourage and show as models.
- As a Regulator, take off hat and sit down with people to get solutions (ex. Ski erosion control.)

Alfred Wanger (CCC)

- Tremendous Collaborative processes with leveraged opportunities.
- “Protect the best and restore the rest” Mattole; need to actively protect – proactively.
- Land/Water connection is at the heart of this; Support better management and management/planning decisions.

Darrin Polhemus (DWQ)

- Outsider perspective because unable to attend conference.
- Congratulations for not going away- working on it for over 30 years.
- Continued path to break problems into pieces as were doing with irrigated agriculture, dairies, timber, etc.
 - Can address them at all different scales
 - With Porter Cologne, have authorities that other states are envious of.
 - Where to put limited resources, always a problem.
- What to do about land use control?

James Maughan (DFA)

- \$1.6 Billion since Prop 13- 84
- Need to really look at Multi-Use projects with limited funds available.
- Government doesn't see a benefit from money spent. We need to do a better job of showcasing benefits of funding.
- Looking for ideas of where to put money, what we should be funding.

Sam Ziegler (USEPA)

- Bonds need to be written to get passed, but also water quality improvement.
- Good about EPA pushing quantifiable results and accountability, even though not everything from Washington makes sense.
- Focus on fewer areas and get real successes. Infers some will be left out.
- Protect needs to make sense in your watershed.

- Look at where you can get biggest bang for buck.
- Create more accountable system- biggest challenge
- Nobody pointed to a waterbody or a portion of a waterbody that is no longer impaired.
- Dealing with broken tools (Ex. Clean water act)
- Need feedback to make institutional changes
- Need for regional governance
